## Education

### University of Minnesota - Twin Cities

B.A.S IN INFORMATION TECHNOLOGY INFRASTRUCTURE

Minneapolis, MN

Graduated May, 2018

## Projects

### slickShop

REACT, REACT HOOKS, CONTEXT API, SEMANTIC UI, NODE, EXPRESS, MONGOOSE, AND MONGODB

- Inspired by the largest deal-sharing community website that allows consumers to discover, shop, share, and rate the best deals and coupons available, SlickShop is a full-stack crud application project that mirrors a few of the functionalities. User experience includes the ability to create an account, log in with authentication, create deal postings that can be updated and deleted, and read other available posts.

### TicketDream

HTML, SASS, VANILLA JAVASCRIPT, WEBPACK, AND BABEL

- TicketDream is an application project inspired by Ticketmaster, a ticket sales and distribution company that allows its customers to search for and purchase tickets to concerts, sports, arts, theater and other events. Built with MVC Architecture using ES6 Vanilla Javascript programming, TicketDream uses Ticketmaster API to fetch data and provide its users with information on events such as artists/performers, tours, concerts, venues, locations, and prices.

### OMDB Movies Database

REACT, REACT HOOKS, REDUX, AND CSS

- OMDB Movie Database is a project that was built using React, showcasing React Hooks functionality which allows the project to fetch information from OMDB API, and Redux to manage state flow. Active users are able to search for their favorite movies and read about the director(s), starring actors, plotline, release date, and runtime.

## Work Experience

### Retail Tech Inc.

IT SERVICE DESK COORDINATOR

Chanhassen, MN

May, 2018 - Oct, 2019

- Professional and proficient use of Astea, a Field Service Program, to manage and facilitate service tickets submitted by retail store associates of partnering companies.
- Skillful use of Applix, an online analytical processing database server, to distribute service tickets between collaborating technicians and maintain an updated inventory database.
- Provide courteous, intelligible, and prompt customer service via phone and email through clear communication and positive language to meet the needs of clients.
- Collaborate and coordinate between technicians to develop strong teamwork and meet the needs and goals of the team as a whole.
- Engage in dialogue with Service Delivery, Product, and IT management to discuss and manage the status of productivity, how to cultivate new improvements using known issues to implement new strategies and policies, and how to better support one another to achieve the highest level of service possible.
